

VIDEOMED HEALTH

Doctor's Operations Guide

Everything you need to know to get started and work smoothly within the VideoMed system.

CONTENTS

- Platform, Registration & Training
- Booking & Carelink
- Attendance & Leave
- Services Offered
- Payments & Billing
- Medical Aid Process
- Lancet Laboratories
- Consumables & Stock
- Room & Safety
- Community Outreach
- Key Contacts
- Files You Will Receive

01

GETTING STARTED

Platform, Registration & Training

Once your contract is signed, a **VideoMed training video** will be sent to you. Watch it before your first day — it covers everything you need to know about using the platform.

Practice number: When registering on VideoMed, you must use VideoMed's unified practice number: **1183362**. Do not register with your own individual practice number.

If at any point the VideoMed platform is not working or experiencing errors, you may perform consultations manually. Once the system is back online, all patients seen during downtime must be uploaded and documented on the platform.

Note on downtime documentation: When creating patient services on the system after downtime, do not re-send documents to patients — simply record the service for internal documentation purposes only.

Templates for referral letters, sick notes, and scripts will be provided to you at the start. At Medirite sites, doctors also receive a laptop, stethoscope, and data as part of their starting resources.

02 PATIENT BOOKINGS

Carelink Booking Platform

When you register on VideoMed, a **Carelink profile is automatically created for you** using the same information — no separate registration needed. Carelink is VideoMed's booking platform, allowing patients to book appointments with you online. A QR code for the Carelink website will be provided in your marketing materials for patients to scan and book.

When a booking is made on Carelink, it reflects **automatically on your VideoMed calendar**.

Carelink website: carelink.digital

03 SCHEDULING

Attendance & Leave

The virtual receptionist will check in with you each morning when you arrive, and again when you leave, to update the attendance log.

Leave policy: If you plan to take leave, notify us at least **one week in advance** by emailing info@videomed.co.za.

04 SCOPE OF PRACTICE

Services Offered

VideoMed doctors are expected to provide a full range of primary care services. Below is the scope of services offered at our sites.

CORE GP SERVICES

- Consultations & diagnosis
- Acute & urgent care
- Chronic disease management
- Preventive care & screenings
- Immunisations & vaccinations
- Prescriptions & repeat medication
- Referrals to specialists

SPECIALISED SERVICES

- Mental health & counselling
- Sexual health & family planning
- Women's & men's health
- Childhood health & paediatric check-ups
- Minor surgical procedures
- Telemedicine / virtual consultations
- In-room procedures (e.g. urinalysis, ear syringing)
- Home visits
- Weight loss management

A full GP price list is attached separately. Prices exclude consumables.

Pricing reference: The VideoMed GP price list (attached) outlines all procedure codes and consultation fees. Please familiarise yourself with the codes — you will use them for billing and activity sheet entries.

05 FINANCE Payments & Billing

VideoMed accepts cash, card, and medical aid from all patients.

CARD PAYMENTS

POS machines are available at all sites, customised per site.

CASH PAYMENTS

Collect cash directly. It will be deducted from the total amount owed to you at billing.

Activity sheet — critical for billing: You will receive an activity sheet when you start. Every patient seen must be logged on it. **Billing is done exclusively from the activity sheet.** By end of each week, all entries must be complete — including patient name, service rendered, payment type (cash, card, or medical aid), and the amount.

Monthly invoices: An invoice template will be provided. Fill it in and send it to accounts@videomed.co.za by the **last day of every month**. For payment enquiries, email info@videomed.co.za.

06

MEDICAL AID

Benefit Check, Invoicing & Submission

For every medical aid patient, the virtual receptionist handles the benefit check, invoicing, and submission to the medical aid — but the doctor must provide the required information **while the patient is still in the room**.

Send the following to the virtual receptionist:

- 1 Patient full name and surname
- 2 Medical aid provider (e.g. Discovery, Momentum, Bonitas)
- 3 Medical aid option / plan
- 4 Medical aid membership number — you can send a photo of the medical aid card; all of the above should be on it
- 5 Whether the patient is the **main member or a beneficiary** — if there are multiple beneficiaries, specify which one
- 6 **ICD-10 code** for the diagnosis — this is essential for claim submission

Once the virtual receptionist receives this information, they will check benefits and submit the claim within minutes, then advise you whether there is a co-payment due so you can proceed with the consultation.

ICD-10 code is mandatory. Claims cannot be submitted without it. Always confirm the code before sending patient details to the receptionist.

07 PATHOLOGY

Lancet Laboratories

VideoMed has a collaboration with Lancet Laboratories. Blood draws can be done at our sites using the Lancet kit available at each location. A stock list will be sent to you when you start.

Each site has its own Lancet CRO (Client Relations Officer) who handles sample collection and can assist with setting up your **Lancet PathPortal** login for viewing patient results.

Group practice forms: Our sites operate under VideoMed as a group practice, with a specific mnemonic code per site. All Lancet forms must be submitted under the VideoMed name using the correct site code.

MEDICAL AID PATIENTS

Use the Lancet **medical aid form**.

CASH PATIENTS

Use the Lancet **cash form** and include the cash payment with the sample for collection.

Important: Lancet does not accept card payments. Blood test billing is entirely separate from consultation billing.

To order more Lancet stock, contact your site's CRO directly.

For **radiology referrals**, VideoMed has a partnership with **Morton & Partners** — patients can be referred there for any radiology services. For radiology arrangements or other pathology enquiries, contact the pharmacy liaison at ghada@videomed.co.za.

08 OPERATIONS

Consumables & Stock

VideoMed provides a starter kit for every site. A list of included items will be sent to you at the start of your onboarding.

If you are running low or out of stock on any consumable items, contact ghada@videomed.co.za to arrange a restock.

09 HEALTH & SAFETY

Room Cleanliness & Waste Disposal

Maintaining a clean and safe consultation room is a professional responsibility. Please ensure the following at all times:

- Appropriate bins for safe disposal of clinical and sharps waste must be in the room and used correctly.
 - The room must be kept clean and tidy throughout the day.
 - Report any cleanliness or safety concerns immediately to info@videomed.co.za.
-

Contamination incidents: Any incident related to contamination must be reported to management immediately and documented. Please refer to the VideoMed SOPs for the full contamination incident clause and required documentation process.

10 GROWTH Community Outreach & Marketing

VideoMed actively supports and encourages doctors to engage with the surrounding community. This includes outreach to old age homes, free screening activations, and other community health initiatives.

If you have a marketing idea or outreach plan, VideoMed will provide marketing materials to support it. Contact **Ishtiaq** for all marketing support.
